

## CORE RESULTS OF SILK THERAPY

### Younger, Smoother and Firmer Looking Skin

- Stimulates Collagen Production
- Cellulite & Wrinkle Removal
- Hydrates Dry Skin
- Extracts Toxins
- Neutralizes Free-Radicals
- Powerful Exfoliator
- Reduces Appearance of Age Spots

### Treats Various Skin Conditions

Including: Eczema, Psoriasis, Ichthyosis, Healing Wounds, Scar Tissue Reduction

### The Therapeutic Silk Experience

- Elevate Serotonin Levels
- Improve Circulation
- Oxygen Rich Water
- Pure Relaxation

## THE MOST ADVANCED SKIN REJUVENATION SYSTEM.

100% Natural. Zero Chemicals. Instant Results.

## THE SCIENCE OF SILK

Highly advanced equipment produces and rapidly releases billions of micro oxygen bubbles into your Silk Spa. These micro bubbles are 50 times smaller than a typical air bubble produced by nature, measuring only 50 microns in diameter.

These negatively charged micro bubbles are attracted to the surface of your skin and are subsequently drawn deep into your pores (*human pores are approx. 70 microns in diameter*).

Once the micro bubbles have entered your pores, they begin to work together transforming the appearance and feel of your skin. Three key functions are being accomplished by the micro bubbles at this stage:

**1. Removes toxins and impurities.** Using their negative charge and large surface-to-volume ratio, the micro bubbles start clinging to impurities and toxins - lifting them out of your pores as they are flushed away to make room for new micro bubbles.

**2. Free radical neutralization.** Free radicals are damaged cells that are a byproduct of your body's continuous natural process of metabolizing oxygen. Free radicals are missing a critical molecule that they'll rob from any source available, making them extremely destructive to your skin's health and appearance. Silk micro bubbles neutralize free radicals by providing them with this missing molecule, rendering them harmless to your skin in the process.

Free radical (green) absorbing missing molecule from micro bubble.

**3. Collagen Rejuvenation.** Micro bubbles have a high concentration of wet oxygen - which means that each bubble contains an elevated level of water vapor. Inside your pore, the micro bubble can release this wet oxygen to be absorbed within your pore. Oxygen is a catalyst and energy source for cellular functions and is responsible for the rejuvenation of collagen and skin cell growth. The result is smoother, firmer skin that appears younger and healthier.

Silk micro bubbles being released into the spa water forming a cloud of effervescent highly oxygenated water. Visit [www.silkspas.com](http://www.silkspas.com) to view the video of this process from start to finish.

## CORE RESULTS OF SILK THERAPY

### COSMETIC

**YOUNGER, FIRMER LOOKING SKIN**  
It is well known that our bodies change with age. The machine that once diligently protected our youth begins to neglect the conservation of our appearance. Silk therapy is a powerful defender of our natural beauty turning back the hands of time by restoring collagen levels, increasing circulation, removing toxins and neutralizing destructive free radicals. Changing the way we deliver oxygen to the skin, Silk therapy erases the limitations of your current beauty routine and restores your skin's health at a cellular level.

### COLLAGEN INFUSION

At age 30 your natural collagen production declines rapidly. Silk Micro bubbles stimulates natural collagen production, repairing and rejuvenating the strength, structure and firmness of your skin erasing years or even decades from your skin's appearance.

### WRINKLE REMOVAL

Increasing your collagen levels in addition to toxin removal, free radical neutralization and wet oxygen absorption plumps your skin resulting in the reduction and/or removal of wrinkled skin.

### CELLULITE ERASER

As the female body ages, estrogen levels lessen. Loss of estrogen results in fewer receptors in thigh blood vessels and subsequently decreased circulation, oxygen levels and nutrients being delivered to the skin. This produces larger fat cells that begin to stick out through the collagen, which we see as cellulite. Silk therapy increases circulation and oxygen levels in the skin allowing the cellulite fat to be used by the body.

### DRY SKIN REVIVAL

Silk therapy cleans and moisturizes your skin at a microscopic level. Billions of micro bubbles are drawn to your skin and enter deep into your pores. The result is an elevated level of skin hydration that effectively revives your dry skin.

### HEALTH/MEDICAL

#### ECZEMA RELIEF

While irritants in the environment can trigger an outbreak of eczema, Silk Micro bubbles provide an additive-free cleansing experience to relieve itching. Normal tap water becomes a source of relief as micro-bubbles enter the spa and increase oxygen levels in the water up to 70%.

#### PSORIASIS

The National Psoriasis Foundation defines psoriasis as a chronic, autoimmune disease affecting the appearance of the skin. In its most common form, psoriasis appears as raised red patches. Silk Spas™ hydrates the skin relieving the redness and dry patches.

#### ICHTHYOSIS

Caring for ichthyosis can feel like a full time job. In just 25 minutes, Silk Spas™ provides a non-invasive, natural solution for cleansing, exfoliating, moisturizing and softening of the skin.

Also: Wound repair, age spot removal, powerful exfoliator and reduction in scar formation. Find more information @ [www.silkspas.com](http://www.silkspas.com)

## THERAPEUTIC BENEFITS

Mountains, beaches and waterfalls all release negative ions (anions) which are absorbed into our bloodstream. These anions inflate serotonin levels, elevate our mood, decrease stress and increase energy. Silk micro bubbles expel large amounts of anions during their production and therefore create an extremely therapeutic environment for positive mental and physical health. As an added benefit, the abundant anions neutralize cations. Cations are produced by computers and electronic devices and have a negative effect on our bodies and mental health.
